

Your school cycling planning guide

A practical checklist for primary school teachers. Choose the programme, prepare your enquiry and agree delivery with Cyclopath.

1. Choose a suitable starting point

Programme	Best starting point	Delivery
Cycle Right Stage 1	Pupils ready to build safe cycling habits and road awareness	8 hours over multiple visits
Cycling Skills	Pupils who already cycle independently	5 hours over multiple visits
Inclusive Learn to Cycle	Pupils who need extra time and a tailored approach	4 hours over multiple visits
Balance Bikes	Junior and senior infants developing balance and coordination	5 hours over multiple visits

Cycle Right Stage 1 is for schools. On-road participation is for pupils assessed as road ready. Inclusive Learn to Cycle accommodates up to 30 pupils. Cycling Skills and Balance Bikes groups are up to 24 pupils.

2. Include these details in your enquiry

School name and location; DEIS status; class groups and approximate pupil numbers; and preferred dates or term. Discuss additional support needs without sending pupils' names or sensitive information.

Preferred dates are subject to availability. An enquiry does not confirm a booking. We will agree dates, programme suitability, group arrangements and the delivery plan with your school.

3. Understand the funding

Cycle Right: Cyclopath manages the funding paperwork. Department of Transport funding is reflected in the quoted price and is not paid directly to the school. The quote is the final amount your school pays Cyclopath.

Green-Schools (non-DEIS schools only): This is a separate application managed by your school. Any approved grant is paid directly to the school. Confirm eligibility and funding availability with Green-Schools.

4. Prepare for the sessions

Bikes and helmets are provided for all primary programmes. Encourage pupils to use their own where possible, as these are what they are most comfortable using. Confirm the training space, timetable and any support arrangements with Cyclopath before delivery.
